**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/16/09 has been entered.

**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brian Batzli on 4/17/09.

Abstract, line 1, replace "comprises" with -includes-; line 9, replace "comprising" with -including-; lines 3, 7-10, replace "means" with -device-.

Claim 22, line 1, replace the phrase "A method as claimed in claim 18" with the phrase - A method as claimed in claim 20-.

Please cancel claims 29 and 30.

***Allowable Subject Matter***

Claims 1, 4, 6-14, 16-22, 24-25, 27, 31, and 34 are allowed.

Claims 1, 4, 6-14, 16-22, 24-25, 27, 31, and 34 are allowable over the prior art of record, none of the prior art whether together singularly or in combination to teach the claimed combination as recited. The closest reference "Horizontal Core Acquisition and Orientation for Formation Evaluation", Skopec et al. does not disclose or suggest the improvement of the instant application comprising maintaining a rotational orientation of a core stationary with respect to the rotational orientation of the core orientation device so that the core reflects a measure of the rotational orientation of the core orientation device as cited in claims 1 & 13, or so that upon rotation of the core orientation device a user can position the core in the measured physical orientation for marking as cited in claim 20, or so that for comparing the rotational orientation of the orientation device at a selected time interval to the rotational orientation of the orientation device at any subsequent time and providing an indication of the direction in which the orientation device should be rotated in order to bring the core into a rotational orientation corresponding to the rotational orientation of the core at the selected time as cited in claims 24 & 27, or so that for relating a recorded specific time to the recorded time intervals to obtain an indication of the rotational orientation of the inner tube assembly and consequently the core contained therein at the specific time interval as cited in claim 31; instead Skopec et al. reference teaches using a combination of an Electronic Multishot Instrument (EMI) and scribe knife-instrument alignment process in determining a rotational orientation of the core and the core orientation device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
